

Chart of the Day Buyers are Rushing into \$RSI

August 21, 2025

Scott highlighted Rush Street Interactive (RSI) as a strong stock despite a down day in the market. He noted that RSI has been in a well-defined uptrend, with buyers rushing in today and pushing the stock higher. The stock has held up well after its last earnings report on blowout volume, staying above its key moving averages. Scott pointed out that every dip down to the 8-day EMA has been bought, indicating strong demand. He suggested setting an alert for a potential breakout above \$20.35, looking for a move accompanied by strong volume.

Next Steps:

1. Set an alert for Rush Street Interactive (RSI) at \$20.35.
2. Look for a breakout above the \$20.35 price level.
3. Confirm the breakout with a move on strong volume.
4. Consider buying on a move through \$20.35 with increased volume, as this would signal a continuation of its uptrend.

Transcript:

0:04: Hey everyone, good evening, it's Scott at Scottrade's on X with Stock Marketmentor.com and your chart of the day.

0:13: Really quick one here, this is Rush Street Interactive, ticker RSI.

0:19: And we had some buyers rushing into RSI today.

0:23: It had a nice green day despite the red day in the market, and it continues to print a bit of a high handle here.

0:30: You can see how this stock has been in a well-defined uptrend, above all the key moving averages, it got slammed, looks like after earnings back down to the 200 day moving average, it fixed itself, and the uptrend continued.

0:43: They then had another earnings report, and it looks like blowout volume.

0:48: That has held the stock up high above all its key moving averages here.

0:52: Every dip down to the 8 day EMA continues to be bought, and so I'd look for some follow-through and upside momentum on RSI with a move through \$20.35.

1:03: So I would have an alert here on RSI at 2035 and look for a move above, coming on volume.

1:10: That's just one of many stocks we're checking out tonight over at Stockmarketmentor.com.

1:14: I hope that's helpful.

1:15: I'll see you next time.
