

## Chart of the Day Ethereum is hitting fresh highs! (\$ETHA)

August 22, 2025

Scott highlighted the iShares Ethereum Trust (ETHA) as a stock to watch, noting that Ethereum has been leading the crypto rally for a couple of weeks. The ETHA recently had its biggest volume day ever, which Scott sees as an indication of institutional money entering the Ethereum ecosystem. He believes that if stablecoins, most of which are on the Ethereum network, continue to grow and solidify the dollar's dominance, there will be a big move in ETHA. He mentioned that while ETHA is a bit extended, Ethereum itself is close to its all-time high. Scott cited a projection by Tom Lee that Ethereum could reach between \$8,000 to \$15,000, which would make ETHA worth at least a double from its current price. He suggested watching for either a pullback to the moving averages or a continuation of the upward momentum as potential entry points.

### Next Steps:

1. Pay attention to the Ethereum ecosystem and related ETFs like ETHA and ETHU.
2. Watch for a pullback to the moving averages as a potential entry point for buying.
3. Monitor for continued upside momentum as another potential entry point.
4. Consider the potential for a double in ETHA if Ethereum's price reaches the high projections mentioned.
5. Look for new developments in the crypto space, especially concerning stablecoins and institutional investment in Ethereum.

### Transcript:

0:03: Hey, everybody, this is Scott at Scottrade's on X with Stock Marketmentor.com and your chart of the day.

0:11: Wanna take a look at the iShares Ethereum Trust.

0:14: This is Ticker ETHA.

0:17: Now, Ethereum has been leading the crypto rally for a couple of weeks now.

0:22: If you actually take a look at ETHBTC, this is Ethereum's performance versus Bitcoin, and it's started to outperform.

0:31: Bitcoin in the middle of July.

0:33: Ever since then, Ethereum has really been leading this crypto rally higher.

0:38: And so I definitely think you should be paying attention to ETHA or one of the other Ethereum ETFs.

0:46: Maybe you like leverage, maybe ETHU is more your style, but these are definitely close to some pretty clear breakouts.

0:54: ETHA today had its biggest volume day ever.

1:01: And that's just one indication of Institutional money coming into the Ethereum ecosystem.

1:11: Now I know there's a lot of chatter about stable coins and people like Scott Besson are saying stablecoins are going to proliferate the US dollar and really solidify.

1:21: , the dollar's dominance around the globe.

1:24: And so most of the money when it comes to stablecoins are on Ethereum.

1:29: And so if that's gonna happen, we're gonna see a big move in ETHA.

1:34: So I would definitely keep an eye on ETHA.

1:37: Now, it is a bit extended off the 8A exponential, but if I look at ETHUSD, we can see, if I zoom out, This is just about off its all-time high.

1:48: Now, people like Tom Lee are saying that they think Eth could do upwards of 8000 to 15,000.

1:56: So if that happens, ETHA I think, is at least worth a double here ultimately from where we are right now.

2:03: So I think that this is a trade that you can watch for.

2:06: A pull back to the moving averages on or continued momentum to the upside.

2:11: Either way, you should be paying attention to the Ethereum ecosystem.

2:15: And if you want to learn more about crypto and digital assets, be sure and check us out at Crypto Market Mentor, a subsidiary of Stock Market Mentor.

2:24: Go to [stockmarketmentor.com/crypto](https://stockmarketmentor.com/crypto) to learn more.

2:28: My name is Scott.

2:29: Thanks for watching.

2:30: I'll see you next time.
