

Chart of the Day Here's the level to watch on CrowdStrike \$CRWD

September 30, 2025

Scott analyzed CrowdStrike (CRWD), noting that the stock is in a long uptrend and is currently forming a handle after a deep, but orderly, cup pattern that took it down to its 200-day moving average. He highlighted that the stock is now consolidating tightly above all key moving averages, sitting right against the \$491 resistance level. Scott believes that a decisive move and close above \$491 on strong volume would be an actionable swing trade signal, with a potential target of \$507 and a revisit to the all-time high of around \$518. He advised establishing a small position with a protective stop loss at \$468 and moving the stop to break-even quickly once the trade begins to work.

Next Steps:

1. Set an alert for a move above the key resistance level of \$491 on CrowdStrike (CRWD).
2. Establish a position with an initial stop loss at \$468.
3. Confirm the breakout by looking for a close above \$491 that comes on volume.
4. Use the breakout as a trigger for a swing trade, targeting \$507 and potentially the all-time high of around \$518.
5. Manage risk by moving the stop loss to break-even as soon as the trade starts working to protect gains.

Transcript:

0:00: Hey everybody, good evening.

0:02: It's Scott at Scottrade's on X with Stock Marketmentor.com and your chart of the day.

0:09: Want to take a look at CrowdStrike?

0:10: This is Ticker CRWD.

0:12: Now CrowdStrike is in an up trend and above all the key moving averages and kind of handling out here after this bizarre looking cup that brought it back down to its 200 day moving average.

0:26: It was a pretty orderly pullback though.

0:28: Anything under the 50 day can get a little sketchy, pulled down to the 200 day moving average, bounced off that level a couple of times, and now, again, just building a little, handle here above all the key moving averages.

0:40: So I actually like this chart here.

0:42: I think you can own a little crowd strike with a protection stop around 468 and look for a move through 491 coming on volume.

0:55: Now, we did tap up.

0:56: Against 491 the last couple of days.

0:58: Yesterday's high was 49,050.

1:01: Today's high 49088.

1:03: And so we're rate against that 491 level.

1:06: I think if we can move through that level, close above that level, and do it on volume, then you might have a swing trading opportunity up to around 507 and a potential revisit of the all-time high just under 520 and around 518.

1:22: So there's a little swing trading set up for you, of course.

1:24: If this trade works out, you're gonna want to move that stop up to break even as soon as possible, not tight enough that you get taken out on just an intraday swing, but enough that you don't, just have a major loss or anything like that because, of any market volatility that we might see this week.

1:43: But I think CrowdStrike is definitely a stock to watch, and it's one that we're watching right now over at stockmarketmentor.com.

1:50: I hope that video is helpful.

1:51: I'll see you next time.
