

Chart of the Day

Wondering what's happening with Alphabet (\$GOOGL)? Let's look at Nvidia (\$NVDA) first.

November 25, 2025

Dan discussed market conditions ahead of Thanksgiving, noting optimism about major indexes despite some resistance levels and specific stock challenges like NVIDIA trading below its 50-day moving average. He analyzed the competitive relationship between NVIDIA and Google/Alphabet in the tech industry, suggesting potential trading strategies based on their diverging performance. Dan expressed confidence in Google's future growth potential and promoted a trading course, encouraging viewers to review materials and testimonials.

Next Steps:

1. Scotty: take the helm and lead tomorrow's session while Dan is off

Transcript:

1

00:00:02.009 --> 00:00:17.160

Dan Fitzpatrick: Well, hey everybody, Dan Fitzpatrick here, StockMarketMentor.com. Okay, it's the day before the day before Thanksgiving. I'm gonna be off tomorrow. Scotty has the helm, he's gonna do an awesome job, but I want to leave you

2

00:00:17.160 --> 00:00:35.149

Dan Fitzpatrick: With this. First of all, we've got the Q's that are just, excuse me, just barely poking their head up above the 50-day moving average. The SPY, pretty much decisively so. I mean, you can see how this thing traded, intraday.

3

00:00:35.980 --> 00:00:50.370

Dan Fitzpatrick: This is where it started today, and it just kind of ran up all the way into the close, and so this kind of bodes well for tomorrow, and hopefully even into the end of the week. But, we are at this point where...

4

00:00:51.060 --> 00:00:53.929

Dan Fitzpatrick: I just draw this little box here.

5

00:00:55.260 --> 00:00:57.920

Dan Fitzpatrick: Okay, so we've got all this...

6

00:00:58.250 --> 00:01:15.340

Dan Fitzpatrick: resistance from folks that bought up here. That's where supply lives, and so we could have a little bit of a tough time climbing through this, but it does look to me like the path of least resistance, at least on the major indexes, is higher. However.

7

00:01:16.050 --> 00:01:30.559

Dan Fitzpatrick: it kind of varies depending on, what you're looking at, and so I want to look at a couple stocks today. First of all, Nvidia. Not, not doing the greatest. It's down below the 50. Let me get rid of this stuff.

8

00:01:32.500 --> 00:01:39.660

Dan Fitzpatrick: down below the 50-day moving average, and not just for a day or two, but for the last week, week and a half or so, I...

9

00:01:39.800 --> 00:01:57.340

Dan Fitzpatrick: think, I mean, the last time it was up, was on the 14th. Ever since then, it's always closed, like, below the... at or below the 50-day moving average, so this is a weak stock. Now, still in a general uptrend. However.

10

00:01:57.480 --> 00:02:05.520

Dan Fitzpatrick: With that said, I can't recall ever seeing, this kind of pattern, and just see the stock do that.

11

00:02:05.810 --> 00:02:17.010

Dan Fitzpatrick: I... I don't recall ever seeing that. What I do recall seeing a lot on something like this is kind of up and down wiggling, back and forth.

12

00:02:17.010 --> 00:02:34.119

Dan Fitzpatrick: Forming some kind of a base, and then, who knows, maybe, hopefully, going up there, but maybe not. The bottom line is, though, we can only trade for today, and I'm not seeing NVIDIA as being something that just makes me want to back up the truck and buy right here, right now.

13

00:02:35.020 --> 00:02:37.160

Dan Fitzpatrick: But I will compare that

14

00:02:37.420 --> 00:02:49.479

Dan Fitzpatrick: with, Google, which... and, well, I guess you could say this is Alphabet, but what I'm really talking about is Google, which is the arm of this company.

15

00:02:49.480 --> 00:03:07.799

Dan Fitzpatrick: It's owned by Alphabet, but it's, that does the, the TPUs, the Tensure processing units, which are basically Google's answer, or alternative, I guess you could say, to the GPUs that, that NVIDIA makes. That's a whole other story.

16

00:03:07.800 --> 00:03:15.450

Dan Fitzpatrick: In and of itself, and I'm not going to do it here in this video, but let's just say that, what is... what's an advantage?

17

00:03:15.450 --> 00:03:22.460

Dan Fitzpatrick: everything that's an advantage to Google, then, is a disadvantage to NVIDIA. Again, it's a really, really complicated,

18

00:03:22.990 --> 00:03:25.949

Dan Fitzpatrick: Really complicated relationship.

19

00:03:25.980 --> 00:03:44.399

Dan Fitzpatrick: With respect to technology and AI and stuff like that, and I am not even remotely, competent to do anything other than make a fool out of myself by, giving you more information about that. But let's just say that, the TPUs are

20

00:03:44.410 --> 00:03:49.850

Dan Fitzpatrick: are in somewhat of a competition with NVIDIA, we'll put it that way.

21

00:03:49.910 --> 00:04:02.620

Dan Fitzpatrick: really, really general, basic stuff. But this is what I want to look at. So, this is a weekly chart. If we look at the daily chart, you can see this chops around a little bit, and it's kind of due...

22

00:04:02.680 --> 00:04:26.960

Dan Fitzpatrick: for a rest. See a nice move here, and then a drift higher, another move here, drift here, there, then another move here. Probably, hopefully, get some kind of a drift, sideways to give us a better opportunity. I put this out today like a little mental health buy. If you feel like, Google's the one that got away, spend a thousand bucks and buy 3 shares. At least you'll make yourself feel good.

23

00:04:26.960 --> 00:04:31.430

Dan Fitzpatrick: Otherwise, wait for a better opportunity here. But check this out.

24

00:04:33.050 --> 00:04:36.639

Dan Fitzpatrick: If we compare, we're looking at Google.

25

00:04:36.780 --> 00:04:44.259

Dan Fitzpatrick: We're looking at NVIDIA, the Qs, and then, in this case, Google. So, if we...

26

00:04:44.280 --> 00:04:59.940

Dan Fitzpatrick: zoom in this way, you can see the orange line, or magenta, whatever you want to call it, that is the QQQs. The green line is NVIDIA, the black line is, Google. So what do we see?

27

00:05:02.200 --> 00:05:03.070

Dan Fitzpatrick: Here.

28

00:05:03.640 --> 00:05:17.550

Dan Fitzpatrick: We'll do it this way. It's just a 3-day chart. What we see here is a clear divergence here, whereas back here, everything was going up, everybody's happy, happy, joy, joy, and then right about here.

29

00:05:17.550 --> 00:05:26.209

Dan Fitzpatrick: we started to see this divergence, where Nvidia and the NASDAQ is falling, while at the same time, Alphabet...

30

00:05:26.220 --> 00:05:41.789

Dan Fitzpatrick: which, again, owns Google. Alphabet, is running higher. And so, in my mind, what you want to be doing is, if you want to do a pairs trade, you know, knock yourself out, buy Google and short NVIDIA, buy calls on Google.

31

00:05:41.790 --> 00:05:51.309

Dan Fitzpatrick: By puts on NVIDIA, or sell puts on NVIDIA. Sell calls, never naked calls, sell calls on,

32

00:05:51.310 --> 00:06:10.400

Dan Fitzpatrick: on NVIDIA. So, there's a lot of different ways that you can trade this, but the point that I just want to make is this. These are two, these... this is a really, really interesting dynamic right here, because I... I'm a little late to the party, frankly, I'll admit it. I never really saw Google...

33

00:06:10.400 --> 00:06:12.499

Dan Fitzpatrick: As being a competitor...

34

00:06:12.500 --> 00:06:37.329

Dan Fitzpatrick: of NVIDIA. But that's kind of what I'm seeing happen, and frankly, I kind of think that's what the market is starting to see, too. Now, the real savvy guys, the real sharp guys, have been seeing it for quite a while. Me, again, I'm a little late to the party, typically the case. I like to arrive fashionably late, and so, in my mind, this still has some ways to go. It's already run.

35

00:06:37.370 --> 00:06:53.630

Dan Fitzpatrick: But if you want to go back and look at NVIDIA back in, say, 2000... I don't know, pick a... pick a year, 2005, 2006, 2007, that thing had doubled. And then it doubled again, and that was really way too late to get Google.

36

00:06:54.570 --> 00:07:12.410

Dan Fitzpatrick: Not so much. So, frankly, I think it's just a matter of time before Google puts on another 30%, 35% of the price. I would absolutely be buying it, and I will be buying it on any kind of a dip, okay? By the way, one other thing, 59-minute trader.

37

00:07:12.810 --> 00:07:37.190

Dan Fitzpatrick: This is something that I've put on, we have put on to, basically, I want you to be making money, trading, like, doing day trading, intraday stuff. And so, if you go to the, to the home page here, unlock your trading potential, there's me, good-looking guy that I am, and you can get all the info that you need here. But this is the lowest price that it's ever been.

38

00:07:37.210 --> 00:07:42.709

Dan Fitzpatrick: That it's ever been offered at, and I do challenge you to go through and look at these.

39

00:07:42.710 --> 00:08:00.060

Dan Fitzpatrick: Look at the testimonials, and look at what we're doing here. This stuff is really, really awesome material. I've taught it for many, many years. I got people making a crap ton of money on it, and I want you to be doing that, as well. So, anyway, that's all I got for you, and I will see you all

40

00:08:00.060 --> 00:08:01.320

Dan Fitzpatrick: After Thanksgiving.
