

Chart of the Day
\$APP is close to a breakout!

December 22, 2025

Scott analyzed AppLovin (Ticker: APP), a standout mobile technology stock that has experienced a "torrid rise" throughout 2025. Despite being up significantly from its lows, Scott identifies a compelling momentum setup as the stock pushes toward a major milestone.

Next Steps:

1. Set Your Alert: Place a price alert at \$745.22. A move and close above this level marks a new all-time high.
2. Monitor Volume: Even if the market is slow, look for "above-average" volume relative to the holiday session to confirm the validity of a breakout.
3. Ride the Momentum: For those already in the trade, Scott's guidance is to stay with the trend. For new entries, a breakout above the \$745.22 level offers a high-probability momentum entry.
4. Don't Chase Blindly: If the stock fails to clear \$745.22 on the first try, watch for a tight consolidation (a "handle") to form just below resistance, which often precedes a successful break.

Transcript:

0:02: Hey everyone, good evening.

0:03: It's Scott at Scott Trades on X with Stockmarket mentor.com and your chart of the day.

0:10: Want to take a look at App Loven?

0:12: This is ticker APP.

0:14: Now, I was just looking at this chart and zooming out and kicking myself for not just buying this thing down here.

0:22: I mean, even at \$11 it's hard to believe the run that this stock has been on, and yet, It's still going and just under the all-time high.

0:33: And so I have an app Loven on an all-time high breakout alert in and around 7:45:22.

0:42: And so I think we should watch for this trend to continue to the upside until it stops doing that.

0:50: And so I would watch for Apple oven to get above 7:45:22 and do it on volume.

0:56: Even though it's Christmas week and volumes are probably going to be light, I wouldn't be surprised to at least see a test of that level or a try in and around the highs on this stock.

1:08: So, that's just one of many things we're watching tonight over at Stockmarketmentor.com.

1:14: I hope that was helpful, and I'll see you next time.
