Chart of the Day

NVIDIA After the Bell: A Rubber-Band Trade, Not a Trend Trade

November 17, 2026

Dan discussed NVIDIA and related stocks following the company's earnings report. He noted that NVIDIA reported monster numbers that beat estimates, though he described forward guidance as still somewhat uncertain. He mentioned that NVIDIA's RS rating on IBD was around 25, placing it in the bottom quartile of stocks by performance. Dan showed charts of regular hours and aftermarket trading, observing that a rally in associated stocks began at 4:20 p.m. Eastern Time when NVIDIA reported earnings. He stated that the movement was a total NVIDIA-driven rally. Dan shared his view that it was a good time to buy NVIDIA for a trade and bet that the stock would reach 180 before it hit 150.

Next Steps:

- **Trade NVIDIA ($NVDA) as a Short-Term Swing or Intraday Setup:**
  - Position for a tactical rebound trade toward the **$180.00** upside level rather than treating $NVDA as a core leadership holding, using **$150.00** as the lower reference boundary.
- **Join Tomorrow's Live 59-Minute Trader Session:**
  - Visit the StockMarketMentor.com homepage to reserve your seat and trade NVIDIA ($NVDA) live at the market open alongside Dan Fitzpatrick.
- **Monitor Associated AI Ecosystem Sympathy Moves:**
  - Track after-hours momentum spillover into correlated names such as Dell Technologies ($DELL) and Iris Energy ($IREN), recognizing that their price action is being driven directly by NVIDIA's earnings reaction.

Transcript:

1

00:00:02.210 --> 00:00:17.520

Dan Fitzpatrick: Okay, Dan Fitzpatrick here, StockMarketMentor.com, and I want to look at NVIDIA and associated stocks in the NVIDIA space, because I think it matters. I'm going to show you some cool things about how these things closed today.

2

00:00:17.520 --> 00:00:26.500

Dan Fitzpatrick: And then how they're trading now, after NVIDIA reported numbers. And, NVIDIA, which shouldn't be surprising.

3

00:00:26.500 --> 00:00:33.100

Dan Fitzpatrick: recorded some monster numbers. They're much higher than, than estimates, but remember.

4

00:00:33.160 --> 00:00:39.839

Dan Fitzpatrick: These numbers were already in the bag before we had the, Jensen Wang thing. So…

5

00:00:40.040 --> 00:00:54.630

Dan Fitzpatrick: you would expect that, and they've always outperformed, like, they've always beaten estimates. But then it's… as far as forward guidance and all that stuff goes, that's a little bit… let's just say it's still uncertain to a point.

6

00:00:54.830 --> 00:01:00.310

Dan Fitzpatrick: But only to a point. Because just remember, NVIDIA's still NVIDIA.

7

00:01:00.660 --> 00:01:12.020

Dan Fitzpatrick: I don't think it's the best stock to own. I'm not even suggesting that you do own it. You can if you want, but… and you don't have to if you don't want to. The relative strength on this thing.

8

00:01:12.090 --> 00:01:16.090

Dan Fitzpatrick: The RS rating on IBD is, like, 25.

9

00:01:16.110 --> 00:01:31.840

Dan Fitzpatrick: So basically, it's in the bottom quartile of stocks when it comes to performance. So, if you're in love with the letters N-V-D-A, hey, this is your stock. But if you want a stock that's really working.

10

00:01:31.840 --> 00:01:39.120

Dan Fitzpatrick: This is not your stock. But with that said, let's look at some of these and see what happens. So, I'm gonna start

11

00:01:39.410 --> 00:01:41.490

Dan Fitzpatrick: With.

12

00:01:41.850 --> 00:01:50.729

Dan Fitzpatrick: I'm just gonna start with regular hours. So we're gonna look at the regular hours here, and see what all these charts look like. Let me get…

13

00:01:51.220 --> 00:01:53.310

Dan Fitzpatrick: We'll share you my screen.

14

00:01:59.630 --> 00:02:03.820

Dan Fitzpatrick: There we go. And get me… Out of the mix.

15

00:02:04.710 --> 00:02:05.680

Dan Fitzpatrick: Okay.

16

00:02:05.800 --> 00:02:06.600

Dan Fitzpatrick: Now…

17

00:02:08.340 --> 00:02:18.099

Dan Fitzpatrick: Regular hours. Let's bang through them here. We're gonna start up at the top here, with here. We'll go from best to worst. So, Dell, okay?

18

00:02:18.330 --> 00:02:22.209

Dan Fitzpatrick: Up just a tiny bit. Again, regular hours.

19

00:02:22.640 --> 00:02:23.510

Dan Fitzpatrick: Ugh.

20

00:02:24.180 --> 00:02:25.090

Dan Fitzpatrick: Yeah.

21

00:02:25.560 --> 00:02:28.480

Dan Fitzpatrick: I know, give me another,

22

00:02:28.960 --> 00:02:29.980

Dan Fitzpatrick: Yeah.

23

00:02:31.030 --> 00:02:36.120

Dan Fitzpatrick: Diving for what? 23, great. Iron. Should be Iran.

24

00:02:37.840 --> 00:02:43.969

Dan Fitzpatrick: Down here at 15. Now, let's go regular, or let's go aftermarket.

25

00:02:44.100 --> 00:02:55.500

Dan Fitzpatrick: Bam! That's nice. That's nice. That's nice. That's really nice. That's nice. That's nice. What happened after hours? This is what happened.

26

00:02:56.920 --> 00:02:58.150

Dan Fitzpatrick: NVIDIA.

27

00:02:58.400 --> 00:03:16.129

Dan Fitzpatrick: Right here, they report earnings at, 4.20 p.m. Eastern Time. This is when the fireworks started. So, then it jostles around like it does, comes back, and then now it's just trading up into the close of.

28

00:03:16.310 --> 00:03:27.610

Dan Fitzpatrick: post-market trading. I don't even know when that closes, I just know it does close. So, what I'm saying is, the numbers that NVIDIA had, and let's just go…

29

00:03:28.210 --> 00:03:29.350

Dan Fitzpatrick: Through him.

30

00:03:30.040 --> 00:03:39.819

Dan Fitzpatrick: Everything kind of changed on all these, right there, at 420. Everything changed right then, so this is a total NVIDIA

31

00:03:39.820 --> 00:03:52.129

Dan Fitzpatrick: driven rally in these stocks. So, I'm… by the way, I'm going to be trading NVIDIA tomorrow morning, in a 59-minute trader session.

32

00:03:52.130 --> 00:04:17.050

Dan Fitzpatrick: And, you can… we're… I can tell you right now, we're gonna make money on this. I think this thing works really, really nicely, and you can be… you can be a part of it. And you can just go to the homepage and find it, and you'll click on this, you can get to here, and then you can reserve your seat for that tomorrow. By the way, this is an enhanced version of me. I haven't looked like this, like, in Never.

33

00:04:17.170 --> 00:04:36.360

Dan Fitzpatrick: So I like my guns and my broad shoulders, but that's not me. That's not the real me. Well, it is. It's a… it's… this is a first derivative of me. But you will get the real me tomorrow if you wanna, take a, you know, take a shot at this. So, we're gonna make some money on this, I want you to be there, but even if you're not.

34

00:04:36.360 --> 00:04:47.170

Dan Fitzpatrick: I think this is a really good time to be buying NVIDIA for a trade. How high this goes, I don't know, but my bet is, if it's at 162 now.

35

00:04:47.250 --> 00:04:50.459

Dan Fitzpatrick: My bet is, it gets to 180.

36

00:04:50.710 --> 00:04:53.820

Dan Fitzpatrick: Before it gets to 150.

37

00:04:53.940 --> 00:05:06.529

Dan Fitzpatrick: That would be… that would be my bet. That's the way I'm trading it anyway. So, anyway, okay, that's all I got for you. You guys, I hope you have a great evening, and I will see you tomorrow.
