Chart of the Day

Watch this level on Flywire $FLYW

November 24, 2026

Scott McGregor examines Flywire Corporation ($FLYW), highlighting its strong relative strength following an early November earnings gap up. Speaker Scott McGregor notes that even during Friday's severe market sell-off, Flywire ($FLYW) held above its 21-day exponential moving average, and following the market bounces on Monday and today, the stock now trades above all of its key moving averages just beneath near-term resistance at **$22.60**. Looking ahead, Scott McGregor advises watching for upside follow-through momentum through and above **$22.60** on good volume, placing a protective stop-loss around the **8-day exponential moving average** as the trade invalidation guardrail.

Next Steps:

1. Monitor the $22.60 Breakout Pivot: Watch Flywire Corporation ($FLYW) for a decisive push through and above $22.60 resistance accompanied by strong trading volume, looking for price to hold above that level.
2. Set Protective Stop-Loss: Anchor a protective stop around the 8-day exponential moving average, keeping the trade valid as long as price holds above the 8-day EMA.
3. Track Moving Average Support: Continue monitoring the 21-day exponential moving average as broader near-term support that defended the early November earnings gap.

Transcript:

[0:00] Hey everyone, good evening. It's Scott

[0:02] at scottrades on x with

[0:04] stockarketmentor.com

[0:06] and my chart of the day. Want to look at

[0:08] Flywire Corporation. This is ticker LYW.

[0:12] Now Flywire has been showing a ton of

[0:15] relative strength. It had an earnings

[0:17] gap up in early November. Has held the

[0:20] gap with near-term support down around

[0:22] its 21-day exponential period moving

[0:25] average. Even on Friday, one of the

[0:28] ugliest days in the market, Flyw Wire

[0:30] closed above its 21-day EMA, showing a

[0:33] ton of relative strength. And following

[0:36] the bounce in the market on Monday and

[0:38] today, we have Flyw Wire above all the

[0:42] key moving averages with near-term

[0:44] resistance at $2260.

[0:47] And so, I would look for some

[0:49] follow-through momentum here on Flywire

[0:51] with a move through and above 2260. You

[0:54] want to see the stock get above and stay

[0:56] above that level and ideally do it on

[0:58] good volume. You could put a stop on a

[1:00] trade like that down around the 8day

[1:03] exponential period moving average. As

[1:05] long as it holds up above the 8day, that

[1:07] trade is valid. So that's just one of

[1:10] many stocks and setups we're looking at

[1:12] tonight over at stockarketmentor.com.

[1:15] I hope that was helpful. My name is

[1:17] Scott McGregor at scottrades on x. I'll

[1:20] see you next time.
